

## EALING I-TREE ECO

**FORMAT:** Microsite, print and digital report

**CLIENT:** Arup, Trees for Cities, The London Borough of Ealing, Treeconomics, Forestry Commission, Forest Research and the Greater London Authority

**SKILLS:** Client relationships, concept generation, brand identity design, illustration, UX, editorial layout

## BRIEF

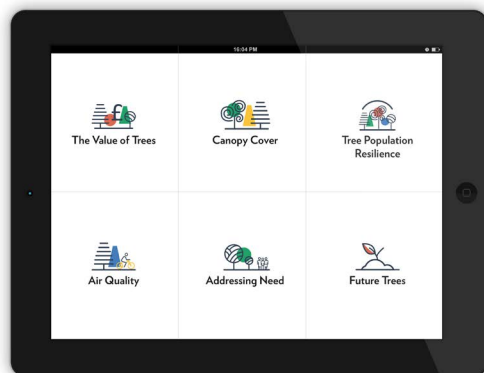

*Partnering with the above organisations, provide a solution to best communicate the findings of a comprehensive assessment of the function and value of Ealing's trees. With a report that is detailed and technical, develop an accompanying microsite that will entice and educate the general public and inspire them to delve further into the subject and full document. The report findings set a baseline to inform future management and help to quantify and value the environmental benefits provided by urban trees, including carbon storage, carbon sequestration, stormwater reduction and pollution removal.*

## RESULTS

As the project had multiple organisations as stakeholders I developed a mini-brand that represented the group and the theme of the project. This included electing fonts, colour palette, technical information (maps and charts) and creating illustrations and infographics.

Working with a developer, we created a microsite which allowed the user to discover Ealing's tree population through interactive maps, statistics and various other data. The themes of the findings were broken into easily accessible stories that brought the data to life in an engaging manner.

I designed the 50 page print and digital report that went further in depth into the findings. Working with a junior designer to flesh out the full document, the mini-brand design elements were used to produce a cohesive campaign.

Event space design

## INNOVATION EVENT

FORMAT: Event, Interactive display

CLIENT: PA Consulting

SKILLS: Concept generation, brand application, illustration, UX, project management

## BRIEF

Using the PA consulting brand, design an event space and guest experience for an evening with stage panel discussion and interactive exhibition area that both engages visitors (current and potential clients) and also promotes the innovative nature of the company.

## RESULTS

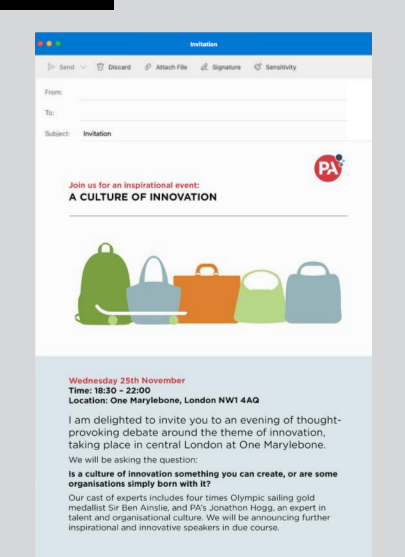

As the lead designer, I was tasked with storyboarding the event to include all visual elements and oversee the production of these elements. The evening included multiple areas of the site which were divided into zones - the stage area utilized screens and vinyls with Gobo projections on walls and ceilings; the reception drinks area had wall vinyls, and the after talk networking area included an interactive exhibition.

For the exhibition area, which was opened after the inspirational panel discussion, I worked closely with a digital production company. We created a set of interactive elements including three touchscreen wrapped kiosks, each with web based apps. Guests used their event passes to activate the RFID reader, automatically transferring their data into the apps (a questionnaire, quiz and thought challenge). Results live updated into an amalgamated video projection wall throughout the night. This encouraged conversations between the guests to exchange their ideas while keeping the event energy upbeat with the gamification elements.

### The Race to Innovation

Pub style quiz to test knowledge of innovations throughout history while also promoting innovative PA Consulting projects.

Screens when inactive (alternates between the two):

- Hi NAME Welcome to the race to innovation
- Who enforced or enforces an idea quota on their employees in order to ensure innovation continues to happen? (Timer: 10)
- You have lost all of your lives
- Thank you for taking our quiz - your score will go onto our leaderboard on the main screen

Quiz starts when guest taps their event pass. RFID registers name/info.

10 seconds to answer question (timer in top right corner counts down).

Quiz ends when all three lives are lost.

Final screen prompts guest to check leaderboard live updating wall for score.

### What type of innovator are you?

Multiple choice questions to find out what type of leader you are - Explorer, Innovator, Driver, Investor, Transformer or Energiser.

Screens when inactive (alternates between the two):

- Hi NAME Welcome to the race to innovation
- When you talk to someone about a problem they're having, what is your first instinct?
- You are an ENERGISER
- OUTWARD FOCUSED

Quiz starts when guest taps their event pass. RFID registers name/info.

Questions rotate to identify what type of innovator guest is.

Results shown with further information.

Last screen shows context of all innovation types.

### The Innovation Challenge

Crowd-innovating - a series of challenges that provoke visitors to come up with suggestions and innovations.

Screens when inactive (alternates between the two):

- Hi NAME Can you help solve this challenge?
- Thanks NAME The most liked idea wins a prize!

Challenge starts when guest taps their event pass. RFID registers name/info.

Guest post their suggestions, which can be liked and commented on.

## ARTEFACTS & INFLUENCE: OBJECTS IN DIALOGUE

FORMAT: Exhibition, wall and window vinyls, print collateral

CLIENT: Arup, Phase 2

SKILLS: Project management, concept generation, guest experience, illustration, editorial layout, delegation and collaboration

## BRIEF

*Develop a look and feel for an exhibition that illustrates aspects of human endeavour and enterprise that have left an impact on the world around us. Objects featured in this exhibition will need a visual solution that allows viewers to easily absorb the narrative.*

## RESULTS

I project managed and led the art direction for this exhibition, collaborating with two designers in my team. After developing multiple concepts, a direction was chosen by the stakeholders. This design then needed to be translated into physical and digital space, telling the story of the featured objects in pairs, each a conversation in itself.

I created a 3D plan to showcase the flow and placement of the 12 objects (which included a 4th Century skeleton and a Long blade, c.12,000 BC flint) and the application of the designs to the wall, plinths and windows. Along with the gallery space designer and exhibition curators we plotted out the guest experience, flow and placement of the objects on display.

My team and I then worked up and tested in the space variations of the design concept until all stakeholders were satisfied. The design was adapted and applied to social media assets, posters, brochures and promotional postcards.

The build of the exhibition was a truly collaborative experience with all involved. The many elements came together to create an exhibition that calmly and quietly told the story of the paired objects and their influence on us all.

## ARTIFICIAL INTELLIGENCE - ENABLING MACHINES TO LEARN.

FORMAT: Exhibition design, wall, floor and window vinyls, digital and print collateral

CLIENT: Arup, phase 2

SKILLS: Concept generation, brand application, collaboration

## BRIEF

*Develop an identity for an exhibition that seeks to stimulate reaction to the hidden revolution caused by machines that learn and adapt. While artificial intelligence started in the 1950s with computers simply executing long lists of instructions, the exhibition highlights the fresh mind-set of AI with Machine Learning.*

## RESULTS

For this exhibition the colour scheme and floor plan had been finalised, and I was brought in to give the exhibition a design look and feel to apply to the space and accompanying collateral.

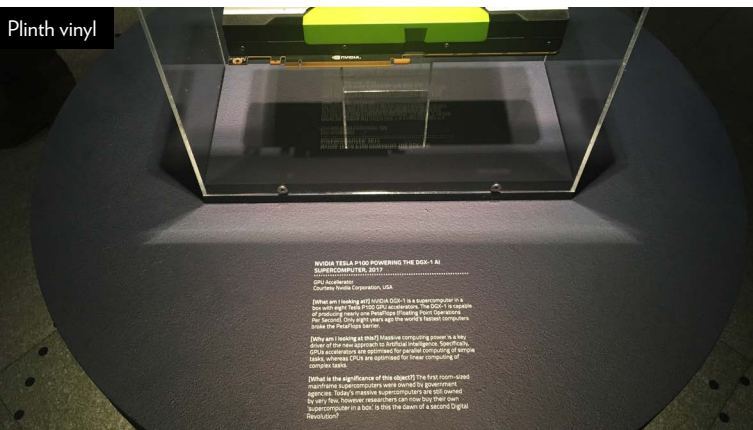

This included a word brand/lock up of the exhibition title, graphic elements such as the wall and floor vinyls that connect the displays sections, and brochures, social media and emails.

Visitors to the exhibition had the chance to experience the new approach to AI, highlighting its strengths and weaknesses. It allowed the visitor to explore the differences between machines that have learned and machines that are learning at the margin - this comprises feedback loops enabling autonomous learning. It also showcased some of today's consumer solutions.

# HULL TRAINS ECONOMIC IMPACTS

FORMAT: Digital and print report

CLIENT: Arup, Hull Trains

SKILLS: Brand application, editorial layout, infographics,

## BRIEF

Using the Arup brand identity, design a report for both digital and print distribution that needs to appeal to the general public with limited technical understanding while also giving detailed information for those in the rail industry. The report investigates the impact of Hull Trains' Open Access services, with particular reference to the economic, social and sustainability benefits gained by the wider Hull and Humberside region.

## RESULTS

Using the brand templates as a starting point, this layout was developed further to give it more of an editorial feel for the 60 page final document.

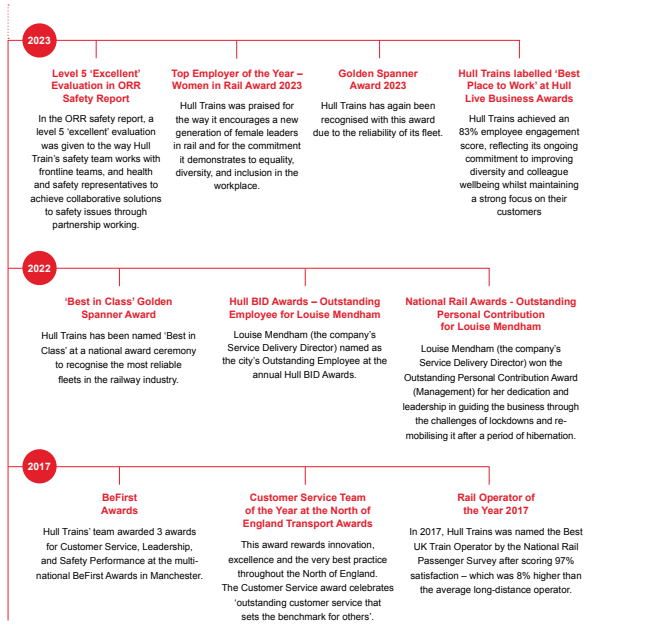

The client (Hull Trains) had a strong set of bespoke photography which added a friendly and welcoming perspective to the subject of the report. Where specific geographical locations were highlighted, I sourced stock imagery.

I used the distinct and comprehensive set of official brand iconography to create mini infographics, and the bespoke charts were developed in a complementary style.

With pull quotes and statistics highlighted for readers who like to skim, and ample white space in the layouts, an easy read of the sometimes very technical information was made possible.

The report was launched at an in-person event with printed reports and simultaneously published online and with accompanied official brand social media assets.

**Introduction**

**Hull Trains**

**Introduction of Hull Trains**  
Hull Trains is a high-speed train service operating between Hull and London. The service was launched in 2010 and has since become a key part of the East of England's transport network. Hull Trains is a joint venture between Hull Trains Limited and the Department for Transport. The service is operated by Hull Trains Limited, which is a subsidiary of the Department for Transport. Hull Trains Limited is a public limited company, and its shares are listed on the London Stock Exchange. Hull Trains Limited is a member of the High Speed Rail Alliance, which is a coalition of organisations that support the development of high-speed rail in the UK. Hull Trains Limited is also a member of the High Speed Rail Users' Group, which is a coalition of organisations that represent the interests of high-speed rail users. Hull Trains Limited is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains Limited is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Fleet Achievement of the Year Award Nomination**

**90% Fleet Availability**

**2022 & 2023**

Hull Trains has achieved a 90% fleet availability rate for the year ending 31st March 2023. This is a significant achievement, particularly given the challenges of the COVID-19 pandemic and the ongoing maintenance programme for the fleet. Hull Trains has also achieved a 95% fleet availability rate for the year ending 31st March 2022. This performance is a testament to the dedication and hard work of the Hull Trains team, and to the reliability of the fleet. Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Awards and Partnerships**

Hull Trains has a strong track record of industry recognition through the awards that it has won. These reflect its dedication to excellence, which is also demonstrated through its partnerships with local organisations. This section provides a summary of key awards and partnerships.

**Awards**

- Golden Spanner Award 2023**
- Top Employer of the Year - Women in Rail Award 2023**
- Level 5 'Excellent' Evaluation in ORR Safety Report**
- Best UK Train Operator 2017**
- Customer Service Team of the Year at the North of England Transport Awards**
- BeFirst Awards**

**Partnerships**

- Hull BID Awards**
- National Rail Awards**
- High Speed Rail Alliance**
- High Speed Rail Users' Group**

**Economic Impacts**

Hull Trains has delivered economic benefits to rail users and wider society. The service has generated significant economic activity, both directly and indirectly. Hull Trains has also generated significant employment opportunities, both directly and indirectly. Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Passenger Numbers**

Hull Trains has seen a steady increase in passenger numbers over the last few years. This is a testament to the popularity of the service, and to the reliability of the fleet. Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**UK City of Culture 2017**

Hull Trains has been established as a key transportation partner in the UK City of Culture 2017. The service has played a significant role in the city's cultural and economic development. Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Cultural Events**

- Hull International Music Festival**
- Hull International Dance Festival**
- Hull International Circus Festival**
- Hull International Theatre Festival**
- Hull International Film Festival**
- Hull International Music and Dance Festival**
- Hull International Circus and Theatre Festival**
- Hull International Music, Dance and Theatre Festival**
- Hull International Music, Dance, Circus and Theatre Festival**

**Looking ahead**

Hull Trains is looking ahead to the future. The service has a number of key priorities, including:
 

- Improving the quality of the service**
- Increasing the reliability of the fleet**
- Expanding the service to new routes**
- Investing in new technology**
- Working with partners to improve the rail network**

 Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Nomination - partnership working throughout the year**

Hull Trains has been nominated for a number of awards, including:
 

- Golden Spanner Award 2023**
- Top Employer of the Year - Women in Rail Award 2023**
- Level 5 'Excellent' Evaluation in ORR Safety Report**
- Best UK Train Operator 2017**
- Customer Service Team of the Year at the North of England Transport Awards**
- BeFirst Awards**

 Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

**Conclusions**

Hull Trains has achieved a number of key milestones over the last few years. These include:
 

- Improving the quality of the service**
- Increasing the reliability of the fleet**
- Expanding the service to new routes**
- Investing in new technology**
- Working with partners to improve the rail network**

 Hull Trains is committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London. Hull Trains is also committed to providing a high-quality, reliable, and sustainable high-speed rail service between Hull and London.

# NATIONAL HIGHWAYS: CONNECTING THE COUNTRY & STRATEGIC ROAD NETWORK INITIAL REPORT

FORMAT: Interactive digital reports

CLIENT: Arup, National Highways

SKILLS: Project management, brand application and development, UX, delegation and collaboration

## BRIEF

*Using the National Highways brand identity, design two interactive digital reports to be distributed to the general UK public via both Gov.Uk (Department for Transport) and National Highways websites. The 'Strategic Road Network Initial Report' summarises National Highways performance, stakeholder insights and condition of the network along with corresponding challenges and opportunities. The 'Connecting the Country' strategic plan introduces the future approach to the Strategic Road Network and explores defining routes by customer needs.*

## RESULTS

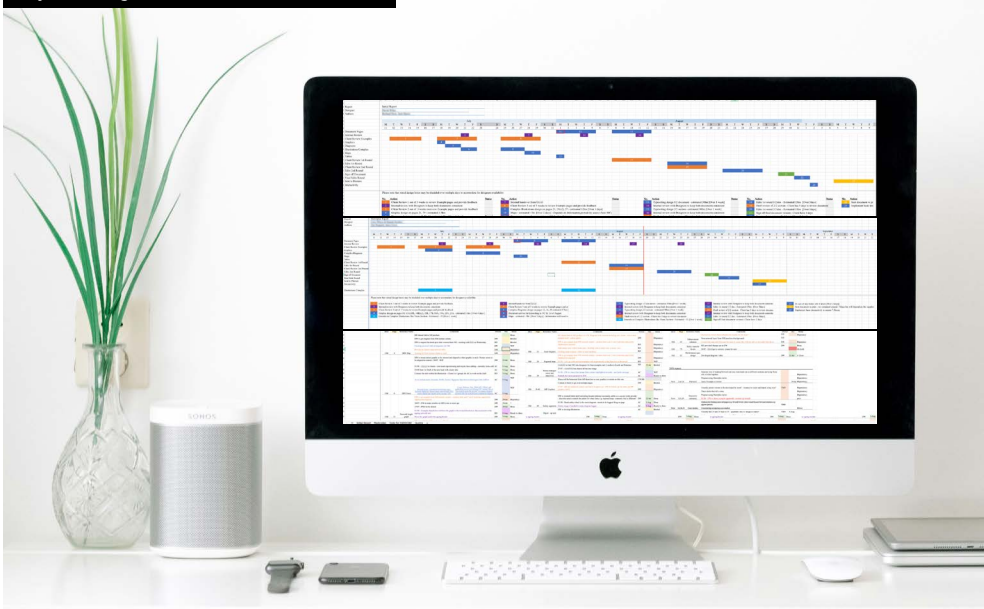

These two interactive documents (180 pages and 70 pages) needed to be produced in a tight timeline. After taking the extensive brief to understand the multiple layers of information to be included, I put together a team of illustrators, artworkers and layout specialists. I tasked them with developing a design system that would work within the client brand guidelines and could accommodate an ever evolving document. We presented our initial concepts to the National Highways inhouse design team, who gave us feedback and advice for our final concepts for the stakeholders. To enable a smooth and orderly process for all involved, I used a central timeline and task assigning tracker to manage the project. This gave us awareness of ours (and each others) responsibilities and progress to make this collaborative project with no bottlenecks or blindspots. The end result was two complementary documents that were informative, easily navigable and digestible to the target audience.

*Case study continued...*

## EVENT STANDS

FORMAT: Exhibition stands

CLIENT: Arup

SKILLS: Project management, concept generation, brand application, illustration, experiential

## BRIEF

Using the Arup brand identity, design bespoke stands to engage and inform visitors at the exhibitions attended.

## RESULTS

Assessing each exhibition and its audience, I developed these stand designs using a mix of commissioned illustrations and artwork from existing marketing campaign collateral. This communicates messaging appropriate to the event attendees.

With the Arup brand identity's clean and concise style, each stand uses messaging in a simple way, designed to both attract viewers into it and start conversations. By considering each stand's placement in relation to other stands, along with people traffic flow, I developed visual mock ups (ensuring that all furniture elements were considered). Working closely where possible with the event venue production team and my colleagues who managed the stands, I ensured that the on site build and any subsequent challenges could be resolved efficiently.

## MISCELLANEOUS DESIGNS

Throughout my career I have had the pleasure of designing with various clients and formats, here are some snapshots of the projects that I hold dear to me. Some for the uniqueness of the challenge, for example the long defunct Google Glass, or the excitement of the exposure, for example the Madison Square Garden campaign for St. John's University. Each and every one of these projects has challenged me, taught me a lesson(s) and reminds me of my journey as a designer - one that I am still on as I continue to learn and grow from new projects and the people around me.
